About Me

I am a passionate Computer Science student at Masinde Muliro University of Science and Technology, specializing in backend development, algorithms, and software engineering. I enjoy solving real-world challenges through clean and efficient code. I am currently building projects with Go, HTMX, and SQLite to strengthen my practical skills and prepare for opportunities such as the Google STEP Internship.

Skills

- Programming Languages: Go (Golang), JavaScript, Basic Java
- Web Development Technologies: HTML, HTMX, CSS, JavaScript, Express.js
- Database Management: MySQL, PostgreSQL, SQLite
- Tools & Systems: Git, Linux (Ubuntu), VS Code
- Interpersonal Skills: Problem Solving, Critical Thinking, Team Collaboration, Quick Learning, Adaptability

Education

- Bachelor of Science in Computer Science** 2023–2027
Masinde Muliro University of Science and Technology
 - Coursework: C, C++, Java, Computer Architecture & Design, Fundamentals of Computer Science, HTML, CSS, JavaScript, PHP, MySQL, Calculus, Linear Algebra
 - Developing practical projects in Go and Express.js to strengthen backend engineering skills
- Kenya Certificate of Secondary Education (KCSE)** 2019–2022
Sheikh Khalifa bin Zayed Al-Nahyan Secondary and Technical School
Achieved a B+ grade
Strong performance in Mathematics and Physics.

Projects

- Personal Blog**
Developed using Go, HTMX, and SQLite to share insights on coding, software engineering, and tech learning.
<https://tech-blog-vytu.onrender.com/>
- Simple Portfolio terminal like**
I Built with JavaScript and Winbox.js to create a terminal-style portfolio showcasing web development and problem-solving skills.
<https://portfolio-winbox.netlify.app/>
- built Farmers Website**
A platform for farmers to register, view market prices, and buy/sell locally — reducing exploitation by large distributors.
<https://kenya-s-farms-market-vp0k-git-main-ibrahims-projects-61a7ffb9.vercel.app/>
- Mental Health Tracking System**
A platform that enables users to complete validated self-assessment questionnaires, such as the PHQ-9, to gain insight into their mental health status and take early, informed actions before symptoms worsen.
